International Programs

## Why Study Abroad?

"I learned not only what I am capable of—which exceeded my expectations of myself—but also what pushes the line for me and what I cannot tolerate.

It was a great internal recognition. My best advice is to go in head first and have no regrets!"

*-Jennifer Beynon*

*Communications Studies Major  
Linnaeus University, Sweden*

"Studying abroad is one of the most amazing experiences you will ever have!

You will learn more about yourself than you ever imagined possible. You will laugh, cry, sing, dance, play, and get tested in ways you never could have, had you not left the borders of the United States."

*-Michael Wells*

*Anthropology Major  
Yeditepe University, Turkey*

"I was able to teach Nutrition, in Spanish, to children between the ages of 10-14 years and witness first hand how health is viewed in a developing country.

This is an experience that you absolutely cannot receive confined to the borders of the United States."

*-Kelsey Griffith*

*Human Nutrition Major  
Universidad Catolica del Uruguay, Uruguay*

# Chemistry Study Abroad

## Do I Need to Know a Foreign Language?

While studying abroad is an ideal time to complete foreign language requirements or learn a new language, most of our international partner programs offer extensive coursework in English available to exchange students in most majors.

## Will I Graduate on Time?

YES! students receive UNCG credit for classes taken abroad, so there is no need to prolong graduation — *you can still graduate on time!*

## Can I Afford It?

YES! On semester or year-long exchange programs, students pay regular UNCG tuition and fees. Housing and meal costs are typically equivalent to a semester in residence at UNCG. Any financial aid received at UNCG can be applied to the program costs. In addition, students are eligible to receive travel grants to help offset the costs of airfare. Be sure to review the budget sheet and speak to an IPC advisor.

## Other Benefits...

Simply studying abroad in any country waives a Global marker, and depending on the program, a Global Non-Western marker. Studying abroad is an experience of a lifetime, and you will learn so much about other cultures, other people, and most certainly, you will learn so much about yourself!

## Eligibility Criteria...

Participants must be fulltime students in good academic standing (about 2.75 GPA). Further requirements include support from your department and prior approval for courses taken abroad. All exchange program participants are required to attend pre-departure orien-

tation sessions covering academic, administrative, health, financial, and cultural information necessary to prepare for a successful experience.

## When Should I Apply?

The Fall and Academic Year application deadline to IPC is February 15th. The Spring application deadline is September 15th.

## When Can I Study Abroad?

The best time to study abroad differs depending on your major. Talk to the study abroad coordinator in your department and to an IPC advisor. Generally, students study abroad during their Sophomore, Junior, and Senior year. Students have the option of studying abroad during their fall semester, spring semester, throughout an entire academic year, or during the summer.

## What's Special About UNCG's Programs?

Rather than signing up for preset programs, students work with academic advisors to create tailor-made study plans with their goals in mind. Our programs become an integrated part of a student's path to graduation, rather than an "extra" tacked on.

## Getting Started!

IPC is dedicated to finding the right program for each student, and our huge array of partner universities allows us to do just that. **Call (336) 334-5404 or stop by 207 Foust to schedule an appointment with a study abroad advisor.** This will provide you with more information on appropriate programs, finances, application procedures, and more.

# Chemistry

## Featured Exchange Programs\*

### CANADA

#### Brock University

BU offers chemistry coursework in environmental chemistry, chemical engineering, biochemistry, and biotechnology. In addition, students can take general chemistry coursework, including organic chemistry, physical chemistry, quantum chemistry, among many others.

[www.brocku.ca/chemistry](http://www.brocku.ca/chemistry)

### FINLAND

#### University of Oulu

OU offers coursework in organic and general chemistry, including polymer chemistry, organic chemistry, adhesion chemistry, and more.

[www.oulu.fi/students/ects.html](http://www.oulu.fi/students/ects.html)

### CHINA

#### Chinese University of Hong Kong

CUHK offers coursework in biochemistry, chemistry, Chinese medicine, food and nutritional sciences, among others.

[www.cuhk.edu/english](http://www.cuhk.edu/english)

### KOREA

#### Sogang University

SU offers coursework in the areas of physical chemistry, applied organic chemistry, applied molecular biology, organic chemistry, advanced physical chemistry, and inorganic materials chemistry.

<http://hompi.sogang.ac.kr/goabroad/english>

### SOUTH AFRICA

#### University of Cape Town

UCT offers courses in inorganic, organic, and physical chemistry. In addition, courses are offered in medicinal chemistry.

[www.chemistry.uct.ac.za](http://www.chemistry.uct.ac.za)

#### University of Stellenbosch

US's department of chemistry and polymer science offers coursework in the areas of organic, inorganic, analytical, and physical chemistry. In addition, courses include polymer and industrial chemistry, etc.

[www.sun.ac.za/university/jaarboek](http://www.sun.ac.za/university/jaarboek)

### SPAIN

#### University of Granada

UG offers an extensive variety of chemistry coursework to exchange students, including analytical chemistry; chemical engineering; biochemistry; physical, organic, agricultural, and inorganic chemistry; toxicology; forensic, and pharmaceutical chemistry. UG has a pre-requisite of Spanish 301.

[www.ugr.es](http://www.ugr.es)

#### UCLM Toledo

UCLM-T offers some chemistry courses for exchange students, including optics for chemistry students and chemical physics. UCLM-T is a good option for students wishing to take a combination of both chemistry and elective coursework. UCLM-T has a pre-requisite of Spanish 301.

[www.uclm.es](http://www.uclm.es)

### TURKEY

#### Yeditepe University

In YU's department of pharmacy, students can take a variety of chemistry coursework, including pharmaceutical chemistry, genetics, organic chemistry, biochemistry, toxicology, and more.

<http://yeditepe.edu.tr>

### MALTA

#### University of Malta

UM offers courses in general chemistry coursework, including: organic, inorganic, and environmental chemistry; organic spectroscopy; chemical thermodynamics and kinetics; chemistry of polymers; and more.

[www.um.edu.mt/science/chemistry](http://www.um.edu.mt/science/chemistry)

### UNITED KINGDOM

#### University of Plymouth

UP offers a wide variety of coursework to exchange students, including analytical and environmental chemistry, primary science, and general chemistry.

[www.plymouth.ac.uk](http://www.plymouth.ac.uk)

#### Keele University

KU offers impressive chemistry and biochemistry programs, including coursework in the areas of general chemistry, biochemistry, and medicinal chemistry.

[www.keele.ac.uk/chemistry](http://www.keele.ac.uk/chemistry)

#### University of Strathclyde

SU offers an impressive chemistry program that allows exchange students to take courses in applied chemistry, chemical engineering, biochemistry, pharmacology, forensic and drug chemistry, immunology, among others.

[www.strath.ac.uk](http://www.strath.ac.uk)

### AUSTRALIA

#### Federation University

At Fed Uni, students can choose among a variety of chemistry options, including science and information technology, engineering, and general chemistry coursework.

<https://federation.edu.au/>

#### James Cook University

JCU offers coursework in biochemistry, molecular biology, pharmacology, chemical engineering, and general chemistry coursework.

[www-public.jcu.edu.au](http://www-public.jcu.edu.au)

#### Deakin University

Combining studies in biology, chemistry, biochemical and chemical analysis, statistical analysis and molecular biology, DU offers an impressive program in forensic sciences. In addition, students can take courses in the chemistry department, which consists of general coursework.

[www.deakin.edu.au](http://www.deakin.edu.au)

\*While these are featured programs for the Department of Chemistry, students are by no means limited to these opportunities.
