Why Study Abroad?

"I learned not only what I am capable of—which exceeded my expectations of myself—but also what pushes the line for me and what I cannot tolerate.

It was a great internal recognition. My best advice is to go in head first and have no regrets!"

-Jennifer Beynon

*Communications Studies Major
Linnaeus University, Sweden*

"I was able to teach Nutrition, in Spanish, to children between the ages of 10-14 years and witness first hand how health is viewed in a developing country.

This is an experience that you absolutely cannot receive confined to the borders of the United States."

-Kelsey Griffith

*Human Nutrition Major
Universidad Catolica del Uruguay, Uruguay*

"Studying abroad gave me a greater understanding that there is a large and quickly developing dance world outside the US. I think it was really important for me to recognize how this industry can shift from culture to culture.

Personally, it also challenged the way I think about art and my approach to making art."

-Rachael Mauney

*Dance Major
Edith Cowan University, Australia*

Biology Study Abroad

Do I Need to Know a Foreign Language?

While studying abroad is an ideal time to complete foreign language requirements or learn a new language, most of our international partner programs offer extensive coursework in English available to exchange students in most majors.

Will I Graduate on Time?

YES! students receive UNCG credit for classes taken abroad, so there is no need to prolong graduation — *you can still graduate on time!*

Can I Afford It?

YES! On semester or year-long exchange programs, students pay regular UNCG tuition and fees. Housing and meal costs are typically equivalent to a semester in residence at UNCG. Any financial aid received at UNCG can be applied to the program costs. In addition, students are eligible to receive travel grants to help offset the costs of airfare. Be sure to review the budget sheet and speak to an IPC advisor.

Other Benefits...

Simply studying abroad in any country waives a Global marker, and depending on the program, a Global Non-Western marker. Studying abroad is an experience of a lifetime, and you will learn so much about other cultures, other people, and most certainly, you will learn so much about yourself!

Eligibility Criteria...

Participants must be a fulltime student in good academic standing (2.75 GPA). Further requirements include support from your department and prior approval for courses taken abroad. All exchange program participants are required to attend pre-departure orien-

tation sessions covering academic, administrative, health, financial, and cultural information necessary to prepare for a successful experience.

When Should I Apply?

The Fall and Academic Year application deadline to IPC is February 15th. The Spring application deadline is September 15th.

When Can I Study Abroad?

The best time to study abroad differs depending on your major. Talk to the study abroad coordinator in your department and to an IPC advisor. Generally, students study abroad during their Sophomore, Junior, and Senior year. Students have the option of studying abroad during their fall semester, spring semester, throughout an entire academic year, or during the summer.

What's Special About UNCG's Programs?

Rather than signing up for preset programs, students work with academic advisors to create tailor-made study plans with their goals in mind. Our programs become an integrated part of a student's path to graduation, rather than an "extra" tacked on.

Getting Started!

IPC is dedicated to finding the right program for each student, and our huge array of partner universities allows us to do just that. **Call (336) 334-5404 or stop by 207 Foust to schedule an appointment with a study abroad advisor.** This will provide you with more information on appropriate programs, finances, application procedures, and more.

Call or stop by our office!

Biology

Featured Exchange Programs*

FEATURED PROGRAM—FINLAND

University of Oulu

UO offers a wide array of options for exchange students. Coursework includes human biology, developmental biology, ecology, biochemistry, zoology, botany, genetics, and more. Research opportunities may be available.

<http://www.oulu.fi/students/ects.html>

BOTSWANA

University of Botswana

At UB, students can take a variety of courses in the university's biology department. Courses include biochemistry, microbiology, developmental biology, genetics, and ecology, among others.

<http://www.ub.bw>

CANADA

Brock University

At BU, students can take courses in a wide variety of study areas, including biological and biomedical sciences, biochemistry, oenology and viticulture, biotechnology, neuroscience, and more.

<http://www.brocku.ca>

CHINA

Chinese University of Hong Kong

CUHK offers coursework in the following fields of study: biochemistry, biology, cell and molecular biology, environmental sciences, and molecular biotechnology.

<http://www.cuhk.edu>

SOUTH KOREA

Sogang University

SU offers courses in general biology, plant developmental biology, advanced molecular biology, applied molecular biology, among others.

<http://www.sogang.ac.kr/english>

Yonsei University

YU offers courses in general and laboratory biology, microbiology, biochemical engineering, experimental microbiology, virology, cellular immunology, cell biotechnology, nano biotechnology, and more.

<http://www.yonsei.ac.kr/eng>

SOUTH AFRICA

University of Cape Town

In UCT's department of molecular and cell biology, students can take courses in biochemistry, genetics, and microbiology.

<http://www.mcb.uct.ac.za>

SPAIN

University of Granada

UG offers an extensive amount of biology courses, including anatomical pathology, animal biology, biochemistry, microbiology, histology, genetics, parasitology, botany, human anatomy and embryology, immunology, and more. UG has a pre-requisite of Spanish 301.

<http://www.ugr.es/en>

SWEDEN

Linnaeus University

LU offers an impressive fulltime course in marine ecology, in which students will gain first-hand experience in quantitative data collection and analysis, experimental design, and field work in the Baltic Sea.

<http://lnu.se/?l=en>

UNITED KINGDOM

University of Plymouth

UP offers an extensive biology program with courses in areas such as applied biosciences; environmental, animal, and human biology; nutrition, and marine and wildlife biology. Courses are also offered in human health, disease, and therapeutic interventions.

<http://www.plymouth.ac.uk>

Manchester Metropolitan University

MMU offers an impressive array of biology courses in the areas of biomedical and forensics biology; cell and molecular biology; conservation; human, animal, and wildlife biology; microbiology; medicinal and biological chemistry; healthcare sciences, among others.

<http://www.mmu.ac.uk>

University of Hull

UH offers courses in aquatic zoology, molecular bioscience, biomedical biology, coastal marine biology, ecology, human biology, marine and freshwater biology, and zoology.

<http://www.keele.ac.uk>

Keele University

KU offers coursework for exchange students in the areas of general biology, human biology, biochemistry, biomedical sciences, and neuroscience.

<http://www.keele.ac.uk>

University of Strathclyde

With a focus on biomedical sciences, US offers coursework in the areas of forensic biology, immunology, pharmacology, biochemistry, and microbiology.

<http://www.strath.ac.uk>

AUSTRALIA

University of Canberra

UC offers an impressive biology program available for exchange students. Students can take courses in biological chemistry, diagnostic pathology, forensic biology, genetics, human biology, and water sciences.

<http://www.canberra.edu.au>

Federation University

Fed Uni offers coursework in science, biology, Information technology, business, early childhood, psychology, and engineering.

<https://federation.edu.au/>

James Cook University

JCU offers a range of coursework in the areas of biomedical and molecular sciences, biochemistry and molecular biology, genetics and genomics, microbiology, and physiology.

<http://www.jcu.edu.au>

University of Southern Queensland

USQ offers coursework in the fields of biology and biomedical sciences. Among others, coursework includes human biology, the environment and sustainability, and human physiology.

<http://www.usq.edu.au>

*While these are featured programs for the Department of Biology, students are by no means limited to these opportunities.
